REQUEST FOR EXAMINER INTERVIEW

Examiner Rose:

As you instructed in your voice message, I am submitting this request for an interview in the above-identified case. I would like to discuss the failure of the Sun reference (U.S. Patent No. 5,963,959) to disclose the updating of multiple materialized views, as recited in the claims. In particular, Sun lacks at least the following claim limitations:

Claim 1: "provide the plurality of delta values to a delta adaptation module for updating a second materialized view."

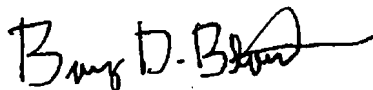

Claim 6: "a second delta processing module that applies the plurality of changes to the second materialized view from the second delta calculation module to the second materialized view."

Claim 11: "means for providing the plurality of delta values to a delta adaptation module for refreshing a second materialized view."

Claim 12: "providing the plurality of delta values to a delta adaptation module for refreshing a second materialized view derived from the first materialized view."

Claim 20: "providing the plurality of delta values to a delta adaptation module derived from the first materialized view."

I would like to schedule the interview for this week, if possible. As such, I will make myself available at any time convenient to you on either Thursday, June 21 or Friday, June 22. Thank you for your cooperation in this matter.

Barry D. Blount
